

County Gets Master Plan For Hospital

A master plan showing methods of future expansion for Harbor General Hospital has been prepared, according to Supervisor Kenneth Hahn. The plan, prepared by Welton Beckett and Associates and other consultants, will be of valuable assistance if and when expansion is necessary. Hahn said.

It shows the site, general location, and size of possible new structures, how existing structures can be expanded, and what road work will be necessary to provide access to any new facilities.

Harbor General Hospital was completed in October, 1962, with a capacity of 600 beds and 108,000 clinic visitors per year. "It is hoped that the present hospital can serve the needs of the public until 1975, but already increasing clinic visitors, admissions, births, and surgeries make necessary future planning for orderly development," Hahn noted.

"It is good planning to prepare for the anticipated population increase so the health of the public will always be protected," the Supervisor said.

Obituaries

Edward Hennessy

Requiem mass for Edward Jerome Hennessy, 59, of 15809 Halldale Ave., will be celebrated in Britain, Conn., with Stone and Myers Mortuary in charge of local arrangements. Rosary was said here Sunday evening.

Mr. Hennessy, a resident of Torrance for 20 years, was born in Connecticut May 19, 1907. He was a veteran of World War II. Mr. Hennessy died last Saturday.

Surviving are a sister, Mary Healy; and two brothers, Daniel and Gerald Hennessy, all in Connecticut.

Painting Means No Smoking

If you are doing a paint job inside your house as part of Spring Clean-Up, the American Insurance Association offers these suggestions to insure fire safety:

- Keep all paint cans closed tightly except those with which you are working.

- Keep containers of turpentine or other flammable paint thinners closed tightly except when pouring from the container.

- Old paint and oily rags should be discarded outside.
- Never smoke when you are using a paint with a flammable base.

- When painting a room, always keep a window or two open part way so that flammable vapors are not allowed to accumulate. Such ventilation also will remove toxic vapors you might breathe in.

Microwave Equipment Damaged

Microwave equipment valued at some \$900 was reported damaged or stolen from the Magnavox Research Laboratories, 2829 Maricopa St., during the weekend.

Irwin Webber of Rolling Hills told Torrance police Monday he had left the microwave equipment on a test stand in the parking lot last Friday about 5 p.m. He discovered it missing when he reported to work Monday at 8:30 a.m.

Police said an antenna and modulator worth \$675 were found in a field east of the parking lot. Both were damaged beyond repair. An adapter and microwave mixer were not located.
